ESSENTIAL LIFE SCIENCES

COCOGEVITY™

THE BEST CHOCOLATE ANTIOXIDANT DRINK ON EARTH!
Cocoa • Açai • Mangosteen • Wolfberry

A typical human frame is comprised of 206 bones. Bones are living tissues that provide structural support for muscles, protect vital organs, and store the calcium essential for bone density and strength. To keep bones strong, the body is continually breaking down old bone and replacing it with new bone tissue. Until the age of about 30, you build and store bone efficiently. Then, as part of the natural aging process, bones begin to break down faster than new bone can be formed.

The body needs calcium to support functions including development and reparation of bones and teeth, nerve function, muscle contraction, blood clotting, and support of proper function of the heart. The National Osteoporosis Foundation suggests that individuals maintain a healthy lifestyle, adequate calcium consumption, and weight-bearing exercise in order to support the strengthening of the body's bones. In order for calcium to be absorbed efficiently by your body, it needs other mineral co-factors.

Youngevity's® Osteo fx Plus™ was formulated to support healthy bones and joints, Osteo fx Plus™ meets the U.S. daily requirements for people over age 50 with 1,200 mg of calcium, and contains the co-factors necessary to help your body better absorb and retain calcium. Vitamin D and Glucosamine; which are natural compounds found in healthy cartilage, also promote absorption, and support optimal health and well-being.

Another important co-factor in Osteo fx Plus™ is the 300 mg of magnesium, which is an essential mineral involved in more than 300 systems in the human body. Magnesium is found mostly in green leafy vegetables, but the USDA says we aren't eating enough fruits and vegetables in our diet! The refined foods, which make up most of our diet, generally have the lowest magnesium and overall nutritional content. Osteo fx Plus™ is the answer to this deficit—it's never too late to commit to bone and joint health with a nutritional step in the right direction!

Osteo fx Plus™	
Key Ingredients	
Vitamin D	400 IU
Calcium	1200 mg
Magnesium	300 mg
MSM	250 mg
Glucosamine	100 mg
Copper	50 mcg
Boron	1 mg
Strontium	500 mcg

Antioxidant-boosting CocoGeVity™ is comprised of a powerful hybrid of the world's most exotic ingredients and luscious fruits, such as Açai, Mangosteen and Wolfberry. The ingredients are intended to provide potent antioxidants that are bioavailable and highly sought after for their nutritious, health-promoting benefits.

CocoGeVity™ boasts an indulgent ingredient ("the food of the Gods") that increases it's naturally coccolicious flavor...Chocolate! Cocogen Extract is a natural extract of the cocoa bean. Chocolate has gained its reputation for having significant amounts of naturally occurring flavonoids, with an antioxidant count twice as high as red wine and three times higher than green tea. Not surprisingly, for 90% of its history, Chocolate has been consumed in liquid form.

Another key ingredient is Açai, the fruit of a palm tree ("The Tree of Life") that grows in the rainforests of the Amazon, and is known to have ten times more antioxidants than red grapes and 10 to 30 times the anthocyanins (polyphenols that give fruits and vegetables their deep color and are high in antioxidant value) of red wine. Antioxidants, which include the vitamins C and E that are found in the Açai fruit, help to neutralize oxygen-free radicals. Açai also has a high concentration of Omega 6 and Omega 9 fatty acids, which help fight the buildup of LDL, or bad cholesterol. Açai promotes cardiovascular and digestive health and contains a large range of vitamins and nutrients including Vitamins B1, B2, B3, C, E, Potassium, Zinc, Magnesium and Phosphorus.

Mangosteen is also recognized for the incredibly potent antioxidant power of its phytonutrient xanthones. Xanthones are the most highly active antioxidants found in the mangosteen fruit and come predominately from the rind or outer shell portion of the fruit. Xanthones are a biological class of phytonutrients that are very stable and have been found to exhibit strong antioxidant activity. Mangosteen has over 40 naturally occurring xanthones!
